PROFESSIONAL SUMMARY

Information Technology Educator with nearly a decade of higher education experience in web development, information systems, networking, and academic research. Builds and maintains web applications using Laravel, PHP, JavaScript, HTML, CSS, and MySQL, while applying AI technologies to strengthen development, research, and instructional-material workflows. Committed to mentoring future IT professionals and delivering practical technology solutions that connect academic instruction with real-world needs.

PROFESSIONAL EXPERIENCE

Assistant Professor I | Pangasinan State University - San Carlos Campus | *September 2024 - Present*

- Deliver undergraduate IT courses in web development, web systems and technologies, operating systems, computer networks, database management, discrete mathematics, and introductory Laravel development.
- Design instructional modules, laboratory manuals, and technology-enhanced learning resources; mentor capstone teams through analysis, design, development, testing, and documentation.
- Develop and maintain web-based applications for academic and institutional initiatives; conduct scholarly research and contribute to peer-reviewed publications.

Instructor I | Pangasinan State University - San Carlos Campus | *August 2016 - September 2024*

- Delivered undergraduate IT courses through project-based and laboratory-centered instruction in software development, database design, networking, and systems analysis.
- Supervised capstone projects and undergraduate research; produced instructional materials supporting curriculum delivery and student learning.
- Contributed to academic and departmental initiatives promoting technology-enhanced education.

TECHNICAL SKILLS

- **Software Development:** PHP, Laravel, JavaScript (Vanilla), HTML5, CSS3, SQL, Bootstrap, Tailwind CSS, jQuery, AJAX, JSON, RESTful APIs, Blade Templating, Responsive Web Design
- **Database & Networking:** MySQL, database design, ERD design, database normalization, SQL query development, Cisco Networking, MikroTik RouterOS, router and switch configuration, LAN/WAN configuration, IP addressing and subnetting, network troubleshooting
- **Development Tools:** Git, GitHub, GitHub Pages, Composer, Visual Studio Code, XAMPP, phpMyAdmin
- **Research & AI Technologies:** Research methodology, academic writing, quantitative research, bibliometric analysis, SPSS, Bibliometrix (R), VOSviewer, OpenAlex, Scopus, Google Scholar, ChatGPT, GitHub Copilot, Google Gemini, NotebookLM

SELECTED PROJECTS

- **PSU Pageant Tabulation System** | *System Analyst / Co-Developer*
Conducted systems analysis and requirements gathering and contributed to development, testing, and deployment of a web-based tabulation system with role-based access, candidate management, automated weighted scoring, real-time tabulation, and report generation. Covered by an IPOPPL copyright registration.
- **SakayPH** | *Full-Stack Web Developer*
Designed and developed a responsive, database-driven transportation information system that provides accessible route and travel information.
- **Lamesa** | *Full-Stack Web Developer*
Designed and developed a PHP and MySQL web platform intended to support digital restaurant business operations.
- **Personal Portfolio Website** | *Designer & Developer*
Designed and developed a personal portfolio showcasing software projects, research publications, academic achievements, and professional experience.

EDUCATION

- **Doctor of Information Technology (Ongoing)** | University of the Cordilleras | *2021 - Present*
- **Master of Information Technology** | Colegio de Dagupan | *2016 - 2019*
- **Bachelor of Science in Information Technology** | Colegio de Dagupan | *2012 - 2016*

RESEARCH PUBLICATIONS

- Selected peer-reviewed publications in artificial intelligence, information systems, educational technology, and human resource analytics.

- AI-Based Resume Skills Extractor and Recommender Modules for State University Human Resource Analytics System (2024).
- A Data-Driven Profile-Based Analytics for Career Path and Upskilling Recommendations in HRS (2024).
- The Influence of Artificial Intelligence on Human Decision-Making, Productivity, and Safety in the Field of Education at Pangasinan State University (2026).
- Assessment of Online Learning System to College Students of State Universities in Region I (2023).
- Microsoft Teams Utilization for Teaching and Learning During Pandemic in Pangasinan State University.
